Projects

<https://hello-bikes.herokuapp.com/> -An ecommerce website built on Ruby on Rails MVC framework. The website was deployed on Heroku and tested using RSpec, has user authentication and authorization, signup and Stripe for payment processing.

<http://vigorous-mayer-4d431a.bitballoon.com/> Website using HTML, CSS and Flexbox.

Experience

Excellus Blue Cross Blue Shield, Rochester, NY, (Software Tester)

July 2015- April 2016

- Analyzed Subscriber Contract for presentation on web for large groups and individual members.
- Analyzed business requirements and system documentation to ensure quality test case coverage.
- Conducted defect calls and communicated test results to business, developers and management.
- Developed Test Plan and Test data for Subscriber Contract Automation project. Participated in design walkthroughs with the Project Manager, Business Analyst and developers.
- Performed functional, regression and end-to-end testing for Excellus and Univera websites. Performed Bug Tracking using HPALM. Submitted daily test status report to the test lead.

VNS of New York, NY (Project Assistant)

Nov 2013 – June 2014

- Assisted in pain management and stroke study projects including compilation, verification and entry of data, and ensuring data integrity and consistency with study protocol.
- Performed telephonic interview and quality test on survey questionnaire.

Volunteer

- Tech Ladies: Founding member of a 20,000 strong women global community in tech. Tech ladies connects women with the best job opportunities in tech.
- Code for social good: Web Developer - Code for Social Good is under transition to a new global platform called calltocode.org. Calltocode will connect nonprofits with technical volunteers, assisting nonprofits in canvassing volunteers, and, helping volunteers identify technical projects that fit their interest and skills.
- GDG DevFest NYC 2017 (Google Developer Group member): manned the registration desk and provided live updates on twitter for mobile and web track.
